Summary

Risk-based framework structurally similar to EU AIA but with distinct development-rights framing rooted in Brazil's Marco Civil tradition. Senate-approved Dec 2024; Chamber of Deputies vote pending 2025. Notable for explicit human-dignity + collective-rights provisions absent from EU AIA. Sets a precedent for Latin American AI regulation if enacted. Currency (2026-06-21): now in the Chamber of Deputies Special Committee (created Apr 2025; rapporteur Aguinaldo Ribeiro), still awaiting the rapporteur's report; the floor vote slipped from end-2025 to a planned 2026 Special Committee vote (targeted around June 2026) and the bill remains unenacted as of June 2026.
