How to read this comparison

These assessments concern the selected documents, not every law applicable in their jurisdictions. Compare the cited provisions, scope, legal status and dates. Matching categories do not establish matching duties; missing entries do not establish legal gaps.

Question for further analysis: Should frontier weight-release be governed by capability-tier (block above threshold) or by safety-evaluation-evidence (allow with pre-release red-team) or by recipient-restriction (export controls)? Three distinct frames currently in active conflict.
