How to read this comparison

These assessments concern the selected documents, not every law applicable in their jurisdictions. Compare the cited provisions, scope, legal status and dates. Matching categories do not establish matching duties; missing entries do not establish legal gaps.

Question for further analysis: Should displacement governance attach to (a) AI providers (originator liability), (b) AI deployers (use-context liability), or (c) state-level retraining + transition programmes (collectivised response)? Each regime allocates the transition burden differently.
