Summary

Procurement-focused operational guide accompanying OMB M-24-10 and the broader EO 14110 / EO 14179 federal-AI policy stack. Provides agencies with: (1) market intelligence on the governmentwide acquisition vehicles covering AI services (MAS IT and the Best-in-Class GWACs; the guide itself enumerates no dedicated AI SINs); (2) supplier due-diligence questions for responsible-AI requirements (bias-testing, transparency, evaluation, security); (3) supply-chain risk-management considerations including model-provenance and dependency disclosure; (4) requirements derivation guidance for safety- and rights-impacting AI per OMB M-24-10 Attachment 1. The guide is non-binding on its own but agencies typically incorporate its language into solicitation packages.

DRIFT-WATCH CORRECTION (2026-07-17, /wiki/drift.json): status was "in_force" — WRONG. The guide existed solely to discharge EO 14110 s.10.1(h); EO 14110 was revoked in full by EO 14148 s.2(ggg) (2025-01-20), and the guide was withdrawn from its canonical home. Mandate revoked + document withdrawn, no successor ' `repealed`. HONEST CAVEAT: no single authoritative document declares this guide withdrawn — unlike EO 14110 (revoked by name) or M-24-10 (rescinded by name), this is a DE FACTO withdrawal inferred from two verified facts: the mandate was revoked verbatim (EO 14148 s.2(ggg)) and the document was unpublished (its sole canonical home, itvmo.gsa.gov/genai, returned 200 through 2025-01-09 and has 404'd continuously since 2025-01-24). M-25-22 rescinds only M-24-18 and never names this guide. `repealed` is the catalog's nearest defunct value; "in_force" was the unsupportable claim. The sourceUrl no longer evidences the instrument.
