Generated 2026-11-19T01:06:26 UTC

Summary

Binding on covered federal agencies. Three pillars: (I) strengthen AI governance through agency Chief AI Officers + AI Governance Boards; (II) advance responsible AI innovation including authorized use, talent, and infrastructure; (III) manage risks from agency AI use with mandatory minimum practices for safety- and rights-impacting AI by December 1, 2024. Agencies must publicly inventory their AI uses annually (continuing the EO 13960 + EO 14110 inventory tradition) and report AI procurements quarterly. Attachment 1 sets the operative risk-management minimum practices (AI impact assessment, real-world performance testing, independent evaluation, ongoing monitoring, public notice + plain-language explanation, human oversight + opt-out for rights-impacting uses).

DRIFT-WATCH CORRECTION (2026-07-17, /wiki/drift.json): status was "in_force" — WRONG. M-24-10 was expressly rescinded and replaced by OMB Memorandum M-25-21 ("Accelerating Federal Use of AI through Innovation, Governance, and Public Trust"), dated 2025-04-03, issued under the AI-policy posture set by EO 14179 ("Removing Barriers to American Leadership in Artificial Intelligence", 2025-01-23). NB: EO 14179 did NOT revoke EO 14110 — the order M-24-10 implemented was revoked by EO 14148 §2(ggg) on 2025-01-20; EO 14179 treats it as already revoked. Not in force since 2025-04-03 — ~14 months BEFORE the prior lastReviewedAt (2026-05-31).
