Summary

Governance posture toward releasing frontier model weights publicly (Meta Llama, Mistral, DeepSeek vs. closed-weight Anthropic / OpenAI / DeepMind). EU AIA Recital 102 + Art. 53(2) carve-outs; CA SB-1047's failed framework; Meta Frontier AI Framework's explicit defence; emerging US export-control overlay.

Contested question

Should frontier weight-release be governed by capability-tier (block above threshold) or by safety-evaluation-evidence (allow with pre-release red-team) or by recipient-restriction (export controls)? Three distinct frames currently in active conflict.
