Generated 2026-11-19T01:05:59 UTC

Summary

Rescinded by EO 14148 (Jan 20, 2025); EO 14179 (Jan 23) set the deregulatory posture. Some §4 reporting persists via Defense Production Act + BIS interim rule.

DRIFT-WATCH CORRECTION (2026-07-17, /wiki/drift.json): status was "partial" — WRONG. EO 14110 was REVOKED IN ITS ENTIRETY on 2025-01-20 by Executive Order 14148 ("Initial Rescissions of Harmful Executive Orders and Actions"), Sec. 2(ggg), 90 FR 8237 (FR Doc. 2025-01901): "The following executive actions are hereby revoked: ... (ggg) Executive Order 14110 of October 30, 2023". It has no operative force. The prior lastReviewedAt (2026-05-24) POSTDATED the revocation by ~16 months — a review affirmed an already-false status, which is precisely why a date-based currency signal cannot catch this class. Downstream artifacts issued under it (OMB-M-24-10, NIST-AI-RMF) are separate rows and their survival does not make this EO "partial".
