Summary

Rescinds EO 14110's regulatory-burden provisions. Directs OMB / OSTP / NSC to remove barriers to AI development. Does NOT itself impose new substantive obligations — coverage is mostly silent. The DPA-grounded compute-reporting interim rule (BIS, Jan 2025) and Defense Production Act §708 reporting persist independently. iter-451 currency review: the order set in motion an implementation arc — 'Winning the Race: America's AI Action Plan' (Jul 23 2025) and follow-on actions on federal preemption of state AI law — though EO 14179's own text imposes no new obligations and remains in force.
