Generated 2026-11-19T01:06:29 UTC

Summary

First broad-spectrum US industry commitments; precursor to EO 14110 §4.2(a) reporting + the Seoul Frontier AI Safety Commitments. 15 signatories across two tranches (Jul + Sep 2023): Anthropic, OpenAI, Google DeepMind, Microsoft, Meta, Inflection, Amazon (Jul); Adobe, Cohere, IBM, Nvidia, Palantir, Salesforce, Scale AI, Stability AI (Sep). Eight commitment areas: internal + external security testing, info sharing, cybersecurity investment, third-party vuln disclosure, watermarking, public reporting, prioritising research on societal risks, deploying AI to address societal challenges. Currency (2026-06-21): EO 14110 — the row's named downstream codification of these commitments — was rescinded by Trump's EO 14148 on 2025-01-20 (EO 14179, 2025-01-23, set the deregulatory posture), removing the associated federal reporting framework; the non-binding commitments were not themselves rescinded but their continuation is now at individual companies' discretion (signatory adherence has fragmented).
